Current Project Status

Schedule

- The project is currently **ON SCHEDULE**

Lane Closures

- Northbound Kimbrough onto westbound Wolf River Blvd is restricted to two (2) lanes
- Eastbound Wolf River Blvd to southbound Kimbrough is restricted to two (2) lanes

Construction Activities

- General site grading
- Grading of drainage laterals
- Construction of bridge approaches and parapet walls on Bridges 1 and 2
- Shoulder grading and paving
- Installation of water lines
- Installation of conduit and poles for roadway lighting in roadway median
- Installation of median landscaping and drip irrigation systems
- Maintenance of erosion control measures

News and Announcements

Winter may have arrived, but work continues on the Wolf River Boulevard project. Both bridges are well on their way to being complete, and large sections of the road have received a base layer of asphalt paving.

Wet weather and cold temperatures will impact the type of work that can be done on site. We are currently installing water lines, landscaping and irrigation, and working on the project bridges and drainage. Site grading will continue off and on whenever the conditions will allow.

Site Access

Now that parts of the roadway are paved, we would like to remind everyone again that the Wolf River Boulevard construction site is a restricted area and is **off limits** to the general public.

Roadway and bridge construction can be extremely dangerous and only authorized personnel should be on the site. *Thanks in advance for your cooperation!*

Project Contact Information

Lighting the Boulevard

The Wolf River Boulevard project will utilize several different types of lighting for both motorists and pedestrians. The roadway median will have ornamental lighting installed in it, providing needed illumination for motorists. These lights, shown in the photo to the right, will be the same style that can be seen in many locations around Germantown.

The project also contains an underpass to allow pedestrians (and critters!) to safely pass under the roadway while using the Wolf River trails. This underpass, along with the underside of one of the project bridges, will be illuminated by a solar lighting system.
